info@balancedcoil.com

Founded in 1999, Balanced Coil Technologies was started with the belief that a strong technical knowledge of metal detection is the foundation for providing customers with the correct metal detection system for their application. With over a decade of metal detector service experience, there are very few applications that we have not sold or serviced. Balanced Coil Technologies is the exclusive sales and service contact for Fortress Technology in Texas and New Mexico. Balanced Coil Technologies offers a wide array of metal detector products and services.

VERTEX VFFS SYSTEMS

BCT is the only authorized sales and integration specialist for the Fortress Vertex VFFS application in the United States. BCT provides complete turnkey solutions with custom plastics and frames to fit every scale and bagger.

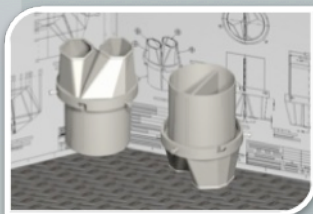

FORTRESS METAL DETECTORS

Fortress Technology has a sturdy track record of manufacturing metal detectors known for exceptional performance, outstanding reliability and simple operation. BCT is proud to represent Fortress by providing an unmatched level of service and dedication.

METAL DETECTOR SERVICE

BCT has built our reputation on service. We offer service and support on most major models of metal detection systems. Ask about our 5 Star Certified Calibration Audits with complete documentation compliant with HACCP, AIB, SQF and BRC standards.

UHMW/HDPE PRODUCT TRANSITIONS

BCT offers custom designed sanitary fabricated food grade transitions for any application. Our precision-engineered plastics are welded using BCT proprietary methods guaranteed to last. Also available in anti-static.

ENGINEERED SOLUTIONS

From foreign matter detection to test cards, BCT is your line inspection and integration specialist. BCT can trace contaminants to the source and solve RF noise interference. We also offer in depth metal detector training at our facility in Addison, TX.
